Yulgilbar Airport

Baryulgil airfield is a private non licensed airfield located on Yulgilbar Station at Baryulgil NSW. The Airfield is fenced; located in a Cattle Paddock, the surface is sealed, the direction is approximately 150/330 degrees, and there is an uphill rise to the South East of approximately 20 meters over the 1600 metre length of the Airfield. Elevation is approximately 450 AMSL. Position: S29.13.3 E152.37.5.

- Please contact the station prior to landing (24 hours notice) so arrangements can be made to meet planes on arrival and transport passengers to the sale.
- There are daily commercial flights to Grafton and Lismore airports by Rex Airlines.
- A number of motels are located in Tenterfield, Casino, Lismore and Grafton (prior booking recommended)
- Travel time by car to Yulgilbar Station (Broadwater division)
 - Casino – 1 hour
 - Tenterfield – 1 hour 30 minutes
 - Grafton – 1 hour, 15 minutes

Please bring this catalogue to the sale

Disclaimer - Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, either the vendors (or their employees) nor the selling agents assume any responsibility what so ever for the correctness, use or interpretation of the information included this sale catalogue.

- All persons attend Yulgilbar Station and the sale at their own risk.

All of us at Yulgilbar welcome you to this, our 19th Annual Production Sale.

It has been a big year at Yulgilbar - new and restored cottages, introduction of centre pivot irrigation (which we can't now use because of the drought), rebuilding some 40km of fencing following the fires in 2018, efforts with close neighbours to get the Clarence Way sealed which looks like being successful and much, much more.

Our cattle continue to be successful. First thanks to you, our supporters as last year's sale, despite the drought was a very good result. New records were broken with bulls selling to \$41,000 and females to \$30,000 on sale day. What was equally pleasing their remained many "good value for money" lots in the sale, with bulls selling from \$3500.

Rob Sinnamon, Brett Ellem and all who have worked to prepare this years sale team believe it's the best team we have presented for many, many years. It is the first time we offer only Classified "S" Bulls with 87 of these being Poll.

The drought still reigns over much of Australia, when it breaks, as it will, producers can look forward to increases in prices which is why, we at Yulgilbar, are confident for the years ahead.

We hope you find something to your liking and have an enjoyable and happy day.

YULGILBAR STATION (since 1840)

Celebrating 179 years Pastoral Settlement

Yulgilbar Station was founded in 1840 by Edward Ogilvie as a 200 000 acre sheep station. The run selected comprised the most fertile region of the Clarence River valley; in North Eastern New South Wales encompassing over 80 kilometers of the river. The property was owned by the Ogilvie family until being sold in 1926 to a syndicate of the Morrissey brothers and silent partner Tom Baillieu.

Sam Hordern was subsequently invited to join the syndicate, ultimately purchasing Yulgilbar in its entirety in 1949.

Sam was a foundation director of King Ranch Australia and the first President of the Santa Gertrudis Australia Association.

Sam Hordern's daughter, Sarah and husband, Baillieu Myer, inherited Yulgilbar upon Sam's untimely death in 1960. Today the property still remains under ownership of Sarah and Baillieu Myer.

WHAT'S IN A NAME:

Yulgilbar means 'Place of many (or little) fishes'.

Yulgilbar is a heritage listed property of natural beauty and of environmental significance.

Yulgilbar contains much historical infrastructure, dating back to 1840. The station is also characterized by its impressive permanent water systems. Yulgilbar was proclaimed a Flora and Fauna reserve in 1971.

Farming: 4500 acres is currently farmed, growing summer and winter cash and fodder crops, supplying the feed requirements of the Station as well as running a significant Hay and Fodder sales business thru "Toooloonki Division".

A herd of 5000 Santa Gertrudis cattle are now run on Yulgilbar. Yulgilbar weaner's have long been renowned for their constitution and doing ability and, in particular, their ability to gain weight under favorable conditions. These steers have sold previously from Victoria to central Queensland with excellent results.

The first Santa Gertrudis bulls were introduced to Yulgilbar Station in 1953 over Durham Shorthorn type cattle with a Devon influence. 16 King Ranch bulls dominated the early history of Yulgilbar.

Other notable sires in the early history of Yulgilbar included bulls from Bolinda vale, sister stud – Elgee Park, Robenlea, Murrumbo, Yarrowonga, Winderadeen, Rosevale, and The Lakes. These bulls all contributed to the development of the stud, along with numerous Station bred sires. Recognized cow lines in the Yulgilbar herd included the "Gold" family going back to a "Glen Prairie" cow (Kirky family).

A major expansion of the stud has evolved over the last 10 years. 500 Stud females are currently single sire mated to elite Poll Santa Gertrudis sires.

Since 2002, 61 outside bred additional stud sires have been introduced to the Yulgilbar gene pool. A significant addition to Yulgilbar genetics eventuated in 2008 with the landmark purchase of "The Lakes" Santa Gertrudis stud (owned by the Bolster family). The female portion of this widely recognized and established stud were purchased; marking the merger of these 2 major stud operations. Yulgilbar now stands as the largest Santa Gertrudis stud cattle operation in NSW.

Significant AI programs are also conducted utilizing the best available genetics. An Australian record at auction (\$80 000) was paid in 2007 for Warena Sahara (poll). This record stood until 2015.

Yulgilbar Santa Gertrudis Stud History

The Station and Stud were managed for many years by the Rogan family. Allan Rogan was manager of Yulgilbar from 1964 - 1987. He was largely responsible for the early success of the stud. The first annual production sale at Yulgilbar was conducted in September 1966. These annual production sales continued until the beef crash in 1974. These sales comprised the sale of bulls, females, steers and significant numbers of Quarter Horse.

Post 1974 Yulgilbar sold on a regular basis at the Summer-land Santa Gertrudis sale in Casino.

Sam Hordern, King Ranch, and others were also responsible for introducing Quarter Horses to Australia. Today Yulgilbar Quarter Horse stud is run from Elgee Park on the Mornington Peninsula in Victoria.

Peter Rogan managed Yulgilbar from 1988-1996. Gail and Blythe Richie managed Yulgilbar from 1996-2001. Rob and Lorraine Sinnamon joined Yulgilbar in 2002 as the current managers.

Yulgilbar believe many breeds of cattle can benefit from the introduction of hybrid vigor through the use of Santa Gertrudis sires. To this end Yulgilbar also breed a number of Santa cows to Angus, Hereford and Charolais to demonstrate the benefit of crossbreeding with Santa Gertrudis. In recent times Yulgilbar has moved to the vertical integration of a significant portion of its product.

Yulgilbar Staff

Yulgilbar Station is fortunate to have an excellent team responsible for the management of the operation. Thank you for the contribution made by all these people.

Yulgilbar currently has 40 bulls available for private sale from \$3500.

Shows

We are proud of our record in recent years exhibiting many stud cattle show champions up and down the East Coast of Australia. We have now consolidated our showing to focus on the commercial reality of our business. We are particularly proud of winning the Santa Gertrudis Australia Association National Steer trophy for 9 of the past 11 years.

We believe comparison of the end result is important and gives us an indication of how industry relevant our cattle are in the market place.

We have made a "commercial practice" of showing and then selling "different" steers at each competition. Yulgilbar has been also involved with the NSW D.P.I.; MLA and CRC in recent research and validation work including validation of the "Feedlot Calculator, CRC "Age to Puberty" scanning; and polled verification testing.

From top left: Brett Ellem, Josh Costello, Lorraine and Rob Sinnamon, Ashlee McLennan, Craig Enseby, Lachlan Brown & Lucy Ellem.

Show Results – Prime Cattle

“Ongoing success in these Industry Relevant competition’s over the past decade in Eastern Australia, from Orange in the South to Rockhampton in the North, continues to validate Yulgilbar’s mantra as producing “Industry Focused, Commercially Relevant Genetics”.

General Manager, Rob Sinnamon notes that he has often heard Rival Santa Gertrudis Seed Stock Breeders argue that Yulgilbar bred bulls were early maturing and do not grow!

“We believe these Commercially driven results in both export and domestic classes disprove the myth that Yulgilbar cattle would not grow; and further proved that the performance bred in these coastal bred cattle enabled them to rival the best performance of all breeds Australia Wide.

Rob went on to say he believed Yulgilbar bulls to be the best value for money bulls currently on the market.”

2019 RESULTS

Primex MSA Performance Feedback Trial

- 1st Eating Quality
- 1st Feedlot Performance Team
- 1st Carcass Performance Team
- 1st Overall Individual Performance
- 1st Feedlot Performance Individual
- 2nd Overall Grand Champion
- 3rd Overall Grand Champion

RNA Paddock to Palate Competition

- Class 37 (Export Class)
 - 4th overall pen of 6 steers Daily Weight gain
 - 2nd individual highest weight gain (3.43kg/day ADG)
- Class 38 (Domestic Trade Class)
 - 4th overall pen of 6 steers Average Daily Weight Gain
 - Champion individual weight gain (3.610kg/day.A.D.G.)
- Class 40 (HGP Free Class)
 - 1st pen of 6 steers overall daily weight gain
 - Champion Individual Weight gain (2.559kg/day A.D.G.)

North Coast National- Lismore

Judge and Brahman breeder David Harsh from Darnarla Brahmans, Tingooro. Qld.

New Santa Gertrudis Breeders and respected long time Breeders provided good competition in the Santa Gertrudis ring.

Yarrowonga Drover son Yulgilbar N128 won the under 12months class.

In the Strong 12- 14 months class ,2 quality sons of the \$52500 Cardona Patterson , Yulgilbar N26 and Yulgilbar N44,stood ahead of the recent Reserve Junior champion from this years Brisbane Royal (Yulgilbar Nevada- a son of the 2016=US National Champion bull 777 Vegas) who stood in 3 rd. place in a quality line of young Santa Gertrudis bulls.

Yulgilbar N128 edged out the competition from winners of the older classes to win Junior Champion bull ; ahead of Yulgilbar N26 who staved off strong competition to win Reserve Junior Champion bull.

N128 then went on win Grand Champion bull.

Yulgilbar Natalie recently purchased at the Yulgilbar Annual Production Sale by the Shannon family won the under 12 months class.

Yulgilbar Nightingale won the 12-14 months class and went on to win Junior Champion Santa Gertrudis heifer.

In the Senior female classes 3 females recently sold at the Yulgilbar sale dominated classes winning all 3 female age groups.

Yulgilbar Lucinda went on to win Senior and Grand Champion female, while Yulgilbar Marigold (both recently purchased by Norm Black) went on to win Reserve Senior Champion female.

Yulgilbar Madonna shown by Nioa Santa Gertrudis won the remaining senior female class.

Yulgilbar rounded out a great day in the Santa Gertrudis ring winning the Breeders Group and also the Sires progeny group (progeny of 777 Vegas).

Friday evening saw over 90heifers from all breeds compete in very strong competition for the. All breeds Junior Heifer Challenge under the watchful eye of Murray and son Riley Weller.

After winning a huge class,Yulgilbar Nightingale progressed to win Champion heifer against some outstanding females from all breeds.

Saturday interbreed judging rounded out a successful show for Yulgilbar winning the prestigious Allbreeds Breeders group and again the Junior allbreeds heifer this time under respected judges Julie Pocock , David Harsh and Graham Jordan.

Primex

Delighted to win Senior and Grand Champion with Yulgilbar Nightingale all breeds female this morning at Primex all breeds show judged by Jason Strong.

Grafton Show - Judges Colin Keever's Lisa Martin, Craig Gapes

Yulgilbar Nightingale (poll), sired by the 2016 US National Champion Bull- 777 Vegas(poll) was named Supreme Beef Exhibit of the 2019 Annual Show.

Yulgilbar was also successful in winning the Interbreed Breeders Group.

Other significant wins included-

Reserve Junior Champion Heifer in the heifer show,

Winner Champion Bull in the Junior Bull classic- Yulgilbar Nashville N26(P) (sired by Cardona Patterson)

Junior and Grand Champion Bos indicus Bull-

Yulgilbar Nevada N40(P)

Junior and Grand Champion Bos Indicus female.

National Junior Santa Gertrudis Show in Warwick

Over 120 students attended this long standing event.

A big congratulations to Georgia Perkins for winning Champion herds person.

Congratulations to Reilly Randall winning senior and grand Parader champion with Yulgilbar Nevada N40.

Georgia PERKINS also won Rev Champion Parader.

Sam Barnsley (recently commenced work at Yulgilbar) was 2nd in his parader's class with Yulgilbar N26 .

In the Stud Cattle show Craig Leggett from Kidman judged the bull classes while Graeme Hoff adjudicated over the female classes.

Yulgilbar N128 (sired by Yarrowonga Drover)was placed 3rd in his age class; while Yulgilbar N26 (sired by Cardona Patterson placed first, Yulgilbar N44 (also by Patterson) placed second.

Yulgilbar N40 placed 5th in the same class (sired by 777 Vegas (imp US).

Yulgilbar N26 was then judged Reserve Champion Bull.

Yulgilbar also thank "Bunda" Santa Gertrudis for purchasing the Moonganna Karachi's semen donated by Yulgilbar towards the costs of running this annual event.

A great event for the Santa Gertrudis breed supporting the next generation!

Yulgilbar Sangus

Diversification of the Bull Breeding Program at Yulgilbar:

Yulgilbar, backed by continuing high demand for Sangus females at our annual production sale; has led to first retaining a small number of bulls for Private sale in 2013. L

Sangus have been a significant arm in the Commercial Breeding Program at Yulgilbar for the past 10 years. These Composite Poll animals comprise The best of Angus and Santa Gertrudis genetics available.

Sangus are "flat backed" tropically adapted cattle are a blend of two of the most marketable and productive breeds of beef cattle used .

Australia Wide.....Sangus combine the productive traits of fertility and meat quality from Angus; while inheriting the proven performance and versatility of Yulgilbar Santa Gertrudis, in terms of weight gain, disease and parasite tolerance; and superior environmental adaptation. Yulgilbar Sangus females combine the productive traits of Angus, with the performance, hardiness and maternal characteristics of Santa Gertrudis, making the female an ideal mother!

Yulgilbar Sangus Females

A finer coat than an Angus, more feminine and angular in outlook while maintaining the calving ease of both parent breeds. The males benefit from the hybrid vigour, and selected proven carcass performance of the Yulgilbar breeding program.

Given the huge uptake in popularity of Angus cattle in recent years these Sangus cattle are an option for producers looking to breed black cattle that comply easily with MSA (Meat Standards Australia) compliance.

At 19% Bos Indicus, Sangus carry enough "Indicus" content to adapt to harsher conditions. A sleeker coat and ability to

travel ,make Sangus a great alternative to Angus, on harder coastal and northern areas . The superior carcass and weight gain of Sangus make them a leading alternative to Brangus and "Ultra Black." Yulgilbar Sangus Steers have consistently performed well in Carcass and feedlot competitions underpinning the commercial relevance of these cattle.

Cattle Selection and Santa Gertrudis Breedplan

Cattle selection

Yulgilbar advocates balanced assessment criteria for cattle selection. This combines visual appraisal for structural soundness, temperament and overall conformation; prudent use of raw measurement data - e.g. frame score, weight, daily weight gain, actual scrotal measurements, eye muscle area and fat scans. Selection of extremes should always be treated with caution. Yulgilbar supports the Santa Gertrudis classification system. Santa Gertrudis group breed plan provides estimates of breeding values that are also of assistance in making choices. Single trait selection for any characteristic is believed to be dangerous and lacks balance in any breeding program. Use of a combination of the many available "tools" for selection in the industry today is valuable and allows the discerning cattle person to be far more informed about their livestock selections than previously before.

Please note bulls marked as Herd Bulls in the catalogue were not registered or eligible for classification. Many of these bulls would classify under breed standards, but due to not being registered are not presented for classification.

- This Year's Sale Bulls have been tested for the Horn Poll Test (developed by Beef CRC and commercialised by Phizer). Results will be available on sale day and on our web site once available.
- Santa Gertrudis Group Breedplan figures supplied are June 2018 Group run.

Fertility

- All females, stud and commercial are pregnancy tested annually and all empty females are fattened and sold for slaughter
- Sale bulls are semen tested and soundness evaluated
- Sale bulls have been Morphology tested
- Sale bulls are tested negative for Persistently Infected carriers of Pesti-Virus
- Herd sires are semen tested annually.

Yulgilbar stud Santa Gertrudis and Yulgilbar Quarter horses are branded with Yulgilbar Symbol

Yulgilbar commercial cattle are branded with CO (helium).

Any commercial Yulgilbar females sold for breeding since 2005 have been cross branded with EO.

EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

In the calculation of EBVs, the performance of individual animals within a contemporary group is directly compared to the average of other animals in that group. A contemporary group consists of animals of the same sex and age class within a herd, run under the same management conditions and treated equally. Indirect comparisons are made between animals reared in different contemporary groups, through the use of pedigree links between the groups.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences between an individual animal's genetics difference and the genetic base to which the animal is compared. For example, a bull with an EBV of +50 kg for 600-Day Weight is estimated to have genetic merit 50 kg above the breed base of 0 kg. Since the breed base is set to an historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic progress within the breed.

The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait.

Whilst EBVs provide the best basis for the comparison of the genetic merit of animals reared in different environments and management conditions, they can only be used to compare animals analysed within the same analysis. Consequently, Santa Gertrudis BREEDPLAN EBVs cannot be validly compared with EBVs for any other breed.

EBVs are published for a range of traits covering fertility, calving ease, milking ability, growth, and carcass merit. When using EBVs to assist in selection decisions it is important to achieve a balance between the different groups of traits and to place emphasis on those traits that are important to the particular herd, markets and environment. One of the advantages of having a comprehensive range of EBVs is that it is possible to avoid extremes in particular traits and select for animals with balanced overall performance.

Birth Weight EBV (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-Day Growth EBV (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

Scrotal Size EBV (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Carcase Weight EBV (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

Eye Muscle Area EBV (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

Rib Fat and Rump Fat EBVs (mm) are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

Retail Beef Yield EBV (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat EBV (%) is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

Selection Indexes

Santa Gertrudis selection indexes are calculated for two market specifications, namely, Domestic and Export. These Indexes relate to typical commercial herds targeting these specifications.

Indexes are reported as an EBV, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the long-term profit generated by his daughters in a sustainable cow herd, if a proportion of heifers are retained for breeding.

The Indexes are derived using Breed Object technology. More information on this technology is available from the Breed Object web site.

Domestic Production Index (\$) – Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Domestic Production Index.

Export Production Index (\$) – Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and are marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Export Production Index.

Note that \$Index Values for individual animals are sensitive to the assumptions used in the BreedObject analysis to calculate the relevant selection index.

Santa Gertrudis Breedplan

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

Accuracy range	Interpretation
less than 50%	Low accuracy. EBVs are preliminary and could change substantially as more performance information becomes available.
50-74%	Medium accuracy, usually based on the animal's own records and pedigree.
75-90%	Medium-high accuracy. Some progeny information included. EBVs may change with addition of more progeny data.
more than 90%	High accuracy estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact Tropical Beef Technology Services or Santa Gertrudis BREEDPLAN

1. Tara Monarch
(purchased for \$25, 000 in 2002)
Semen available for sale.

Warena Sahara (poll) was purchased for an Australian record price at Auction (\$80 000). He is a rare combination of performance and phenotype. He has been validated as homozygous poll and is consistently producing males and females of outstanding quality. Produces physically poll progeny from either horn or poll females. Arguably he is the most successful sire seen in recent times. He is a trait leader for 400 and 600 day growth, along with eye muscle area

Cardona Patterson P53 (P)

Sire: Cardona Jackson
 Cardona Mambo M33 (P)
 Cardona Jasmine J180 (P)

Dam: Waco Treaty (P)
 Cardona Firefly M280 (PS)
 Cardona Firefly 1124

Cardona Patterson P53 (P) was the top price bull at the 2016 Cardona Canowindra sale where he sold to the Yulgilbar Stud for \$52,500. On the day of sale he was 21 months and weighed 960kg (DWG 1.42kg) with a massive eye muscle area of 141 square centimetre, rib and rump fat scans of 17/11mm, IMF% of 4.2 and a scrotal circumference of 43cm.

Patterson's sire was Cardona Mambo M33 (P), who was a first release sire at the 2016 sale with four sons selling for an average of \$22,000.

Patterson is a deep-bodied, smooth muscled bull with excellent breed character, a tidy sheath and a great sire's presence.

2019 Yulgilbar Annual Production Sale Report

Published by Rob Sinnamon · September 9, 2018 ·

Yulgilbar wish to sincerely thank all buyers and underbidders, along with interested spectators who supported our Annual Production Sale on Friday.

Approximately 350 people attended the sale at the Yulgilbar Station (Broadwater Division Sales Complex).

Against the trend of drought affected auction sale results, Yulgilbar posted new records for the Stud.

Stud interest reached new levels following a successful show-ring campaign this past season following a 10 year break from showing led stud cattle.

This, Combined with continuing Steer and Carcase success ,along with again winning the National Santa Gertrudis Steer trophy attracted unprecedented demand for Yulgilbar genetics.

A blend of new buyers, along with solid repeat buyer clientele drove results to new levels for the 178 year old Pastoral Company.

Top money was paid for Lot 1 Yulgilbar Lieutenant- A highly decorated homozygous Poll Show bull, sired by Talgai Hurricane from a top producing daughter of Warena Sahara.

Valued long term repeat buyer- Craig Ross from Kemmis Creek Station at Nebo in Central Queensland paid \$41000 after outbidding large and spirited buyer competition from a number of high profile stud and large commercial cattle operations.

2 bulls shared 2nd top price honours at \$31,000.

Lot 5-Yulgilbar Major -General (a homozygous poll son of the Celebrated prolific sire-Cardona Nardoo from a daughter of the Show champion -Yarrowonga Volunteer again saw multiple bidders competing strongly with RL Pastoral Company , "Mayfield ", Kyogle making the winning bid.

Owned by the Sinnamon family, RL Pastoral Company stud prefix- "Riverina" in turn sold Lot 37-Riverina

Lord Mayor(Poll) - a son of Yulgilbar Councillor (P),for the same money to Scott and Rebecca Dunlop stud operation, located at Proston , Queensland.

The iconic -S Kidman and Co were new buyers, bidding \$30,000 for the Lot 9 grandson of US National Champion bull - CO-OP(poll).Bred out of a top performing daughter of Warena Sahara.

The top 10 bulls sold for the remarkable average of \$23,350; while the 20 top selling Sires averaged \$16 524.

52 classified bulls sold on the day to average \$9048.

A further 10 Commercial Santa Gertrudis bulls sold for the affordable \$5200 average, while 6 Sangus bulls sold to \$8500 to average \$6083.

A highlight of the sale was the record interest in the led Stud Show prospect females.

Topping the auction was Lot 79 Yulgilbar Lucinda L121 with a magnificent bull calf at foot sired by Lot 1-Yulgilbar Lieutenant .The magnificent cow who recently stood 2nd to the Grand Champion Cow at Brisbane Royal sold for \$26.000. Staying off intense competition was "Trip- a- deal" founder Norm Black, Based at Byron Bay.

He then backed up with the \$16000 purchase of the Lot 80 female, while Nioa Santa Gertrudis Stud paid \$10000 for Lot 81 and the weaner heifer selling as Lot 82 saw her make \$8500 going to new breeder Matthew Shannon.

Completing a remarkable sale was the sale of 140 ptc Sangus commercial females. These sought after Yulgilbar females averaged \$1748 to top at \$2100.

Auction Sale gross was \$864200

Following the completion of the sale ,a number of private sales ensued for Private sale bulls, while underbidder of the top price cow (Black Gold- Yamba)successfully negotiated the \$30,000 private sale of undefeated Show female Yulgilbar Mississippi.

This outstanding daughter of Cardona Nardoo was junior Champion female at. Sydney Royal and Beef Australia , along with an undefeated show record at numerous regional shows this past 12 months.

Unfortunately missed the Parent verification for this guy! Displays the phenotype that is consistent with the ongoing success Yulgilbar enjoys in Steer and Carcass competition up and down the East Coast of Australia. Possibly the largest butt profile in this years sale draft ,the thickness through this sire prospect depicts the Commercial relevance of the breeding program at Yulgilbar

PRESCRIBED CONDITIONS OF SALE BY AUCTION

Property, Stock & Business Agents Act (NSW) 2002, Part 6, s.77 and Regulations 2003.

Clause 18 (1) – The following conditions are applicable to and in respect of the sale by auction of land or livestock:

- (a) The principal's reserve price must be given in writing to the auctioneer before the auction commences.
- (b) A bid for the seller cannot be made unless the auctioneer has, before the commencement of the auction, announced clearly and precisely the number of bids that may be made by us on behalf of the seller.
- (c) The highest bidder is the purchaser, subject to any reserve price.
- (d) In the event of a disputed bid, the auctioneer is the sole arbitrator and the auctioneer's decision is final.
- (e) The auctioneer may refuse to accept any bid that, in the auctioneer's opinion, is not in the best interests of the seller.
- (f) A bidder is taken to be a principal unless, before bidding, the bidder has given to the auctioneer a copy of a written authority to bid for on behalf of another person.
- (g) A bid cannot be made or accepted after the fall of the hammer.
- (h) As soon as practicable after the fall of the hammer the purchaser is to sign the agreement (if any) for sale.

Clause 18 (2) – The following conditions, in addition to the above, are applicable to and in respect of the sale by auction of residential property or rural land:

- (a) All bidders must be registered in the Bidders' Record and display an identifying number when making a bid.
- (b) Subject to subclause (2A), the auctioneer may make only one vendor bid at an auction for the sale of residential property or rural land and no other vendor bid may be made by the auctioneer or any other person.
- (c) Immediately before making a vendor bid the auctioneer must announce that the bid is made on behalf of the seller or announced "vendor bid".

Clause 18 (2A) – the following conditions, in addition to the above, are applicable to and in respect of the sale by auction of co-owned residential property or rural land or the sale of such land by a seller as executor or administrator:

- (a) More than one vendor bid may be made to purchase the interest of a co-owner
- (b) A bid by or on behalf of an executor or administrator may be made to purchaser in that capacity.
- (c) Before the commencement of the auction, the auctioneer must announce that bids to purchase the interest of another co-owner or to purchase as executor or administrator may be made by or on behalf of the seller.
- (d) Before the commencement of the auction, the auctioneer must announce the bidder registration number of any co-owner, executor or administrator or any person registered to bid on behalf of any co-owner, executor or administrator.

Clause 18 (3) – The following condition, in addition to subclause (1), is applicable to and in respect of the sale by auction of livestock:

The purchaser of livestock must pay the stock and station agent who conducted the auction (or under whom immediate and direct supervision this auction was conducted) or the vendor the full amount of the purchase price:

- (a) if that amount can reasonably be determined immediately after the fall of the hammer – before the close of the next business day following the auction, or
- (b) if that amount cannot reasonably be determined immediately after the fall of the hammer – before the close of the next business day following determination of that amount, unless some other time for payment is specified in a written agreement between the purchaser and the agent or the purchaser and the vendor made before the fall of the hammer.

Property, Stock and Business Agents Act (NSW) 2002,
section 78 (3) and Regulations 2003, clause 20 (1)

WARNINGS

PENALTY FOR COLLUSIVE PRACTICES

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (a) to abstain from bidding, or
- (b) to bid to a limited extent only, or
- (c) to do any other act or thing that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

Property, Stock & Business Agents Act (NSW) 2002,
section 83 (2) and Regulations 2003, clause 20 (2):

SUCCESSFUL BIDDERS

The actual successful bidder at an auction sale must give to the auctioneer or an employee of the auctioneer:

- (a) the bidder's name, or
- (b) the name of the person on whose behalf the successful bid was made.

PENALTY FOR DUMMY BIDDING

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following:

- (a) make a bid as the seller,
- (b) make a bid of behalf of the seller (unless the person is the auctioneer),
- (c) procure another person to make a bid on behalf of the seller.

Any bid made with the dominant purpose of benefitting the seller constitutes a bid made of behalf of the seller.

A bid may be found to be a bid made on behalf of the seller even though the seller did not:

- (a) request the bid, or
- (b) have any knowledge of the bid.

Severe penalties may be imposed on persons convicted of dummy bidding.

OCCUPATIONAL HEALTH AND SAFETY

All persons attending the sale are advised by the seller that the sale may involve a risk of physical harm and/or loss. Livestock, machinery, plant and equipment may be offered for sale and each such item has its own inherent risks that persons attending the sale need to appraise themselves of. All persons attending the sale do so at their own risk. All purchasers of items sold are advised that they must ensure, before each such item is removed from the sale, that it is safe and without risks to health when properly used. The seller does not accept any responsibility for any harm, loss or damage whatsoever and that you enter or attend the sale at your own risk. The seller's agent is instructed by the seller to conduct the sale in the manner directed by the seller with items placed out and submitted for sale as directed by the seller. The seller's agent has no control over any items offered for sale and accepts no responsibility for any harm, loss or damage whatsoever and that you enter or attend the sale at our own risk.

A Stud succeeds, not because it is big or long established, but because there are people who -

**live it, sleep it, dream it, believe it and ...
have great plans in store for the future for it!**

**Yulgilbar – a stud with a history,
with a vision for the Future!**

Thank you for attending

We trust you enjoyed your visit to Yulgilbar.

We wish to thank those who supported us by purchasing cattle.

**A sincere thank you to all the under bidders and friends of
Yulgilbar who attended our production sale.**

**Also to the Tabulam Lions and
Tabulam CWA for providing the catering.**
